5. <u>Working with Construct / Control flow</u>

Create a bot to print the largest of two numbers.

1 Click on the process button and create a process. After creating a process go to new and create a sequence.

2. From the activity pannel drag input dialog box in the sequence.

3. Fill the Dialog Title, input label and set a variable for the first number and //ly same for the second number

fig 1

4. Now, drag if box from the activities and write the Condition. If the condition is true then it will print "The largest of two numbers is X.

If the condition is false then it will print "The largest of two numbers is Y.

   i.e   Condition _ x > y.

fig 2

5. Run the program and enter the values according to you.

6. Do add a message box to print the desired data.
